

FocusGuard AI — RAG Knowledge Base

This document is generated from the uploaded activity_logs.csv dataset. It summarizes which activities are Productive and Non-Productive and provides activity-level records suitable for a RAG chatbot.

Dataset: 1057 activity records | Productive: 703 | Non-Productive: 354 | Other/Neutral: 0

How to interpret the data

productivity_status is the primary label. Productive activities include learning, research, coding, office work, and similar focused tasks in this dataset. Non-Productive activities include social media, entertainment, and similar distraction categories. The chatbot should answer from the dataset rather than inventing classifications.

Category Summary

Category	Productivity Status	Records
Coding	Productive	264
Social Media	Non-Productive	177
Office	Productive	176
Research	Productive	175
Communication	Non-Productive	89
Entertainment	Non-Productive	88
Learning	Productive	88

Website/Domain Summary

Domain	Status	Records
facebook.com	Non-Productive	89
chat.openai.com	Productive	88
codechef.com	Productive	88
github.com	Productive	88
linkedin.com	Productive	88
twitter.com	Non-Productive	88
udemy.com	Productive	88
stackoverflow.com	Productive	87

Activity Records for RAG Retrieval

Each row below is a source record. A RAG chatbot can retrieve these records to answer questions such as: 'Was Udemy productive?', 'How much time was spent on social media?', 'Which activities were non-productive?', or 'What category was this website assigned?'
